**Dear Member,**

---

### **Member Question to Membership**

I would like to know if there are any educational service agencies that currently provide Applied Behavior Analysis Services and then bill the child's private insurance for those services. I would very much like to visit with anyone who is currently doing this.

Dr. Mary Palmer - [mary.palmer@swsc.org](mailto:mary.palmer@swsc.org)

### **AESA Conference App**

As you know, AESA offered a conference mobile app at our recent Annual Conference. We received great feedback from you on the app! Members really enjoyed having the latest conference information at their fingertips, including the updated agenda, speaker information, location/maps, exhibitor details, attendee list with ability to sort by state, logistics information about the event and more. If you haven't had a chance to see the app, it is still available on the Apple App Store (search AESA 2012) or Google Play - go to <https://aesas2012.gatherdigital.com> - (note: omit the www.)

We are pleased to announce that we have negotiated a program with our mobile app suite provider, Gather Digital, to offer a significant discount on conference mobile apps to our members. If any of the AESA member organizations are interested in offering a

conference mobile app for their events, Gather Digital can provide you with a single event or multi-event app at a 50% discount off of its standard pricing. If you are interested, our account executive contact at the company is Wendy Phillips, who can be reached at [wendy@gatherdigital.com](mailto:wendy@gatherdigital.com) or 919-932-4266. For those of you who were able to make it to the AESA Annual Conference, we were happy to have you there and we hope that you enjoyed the conference and the app.

### **Resource for Working with the Blind/Visually Impaired**

AESA has been contacted by the Perkins School for the Blind with information about their eLearning Community. Levin Bauman, Senior Director of eLearning at Perkins invites you and your staff to visit their website at [www.perkinselearning.org](http://www.perkinselearning.org).
