

AESA Business Partner Webinar

Memo: March 10, 2010
Re: Tuesday March 16 Response to Intervention / AYP resources webinar
To: ESA Superintendents/CEOs
From: Dick Moody, Associate Executive Director

A limited number of companies have completed a due diligence process and have been accepted as Business Partners of AESA. This year we will be featuring a service or solution of those Business Partners in a series of hosted webinars. The first is Computer Automated Systems, which provides an integrated Special Education System Automation Software SEAS™ service on Tuesday, March 16, 11 am Eastern (10 am Central, 9 am Mountain, 8 am Pacific). Complete registration information registration link are included below.

Please distribute this announcement to the appropriate staff at your agency who deal with Response to Intervention, AYP, and Special Education programs for the school districts you serve.

Educational Plan Management System Webinar

The SEAS™ Achievement Plan solution is a single, centralized repository where all educators – teachers as well as administrators – can build, manage, track progress, and analyze detailed student educational plans. This solution allows for collaborative work among student study teams, child support teams, intervention teams, etc., allowing them to work separately on the same plans. SEAS™ Achievement Plans is designed for ease-of-use with single-click operations wherever possible to maximize staff efficiency. Every student plan allows for progress monitoring and tracking, displaying student progress graphically.

RTI and Academic Intervention Plans

Since the authorization of IDEA 04, Response to Intervention (RTI) as a formal part of the special education identification and eligibility process, has taken hold nationwide. At the same time, school districts are rapidly adopting Intervention-based Instruction within the general education arena. SEAS™ Achievement Plans puts the classroom teacher in control of their own data. With the ability to record progress for all students' plans from a single screen, teachers are no longer chained to their desks with administrative paperwork.

Webinar Information

Date: Tuesday, March 16, 2010

Time: 11 am Eastern
10 am Central
9 am Mountain
8 am Pacific
